ABSTRACT

Nowadays, available existing websites in tourism industry. Those are providing basic services only. And there are arranged packages available in the web site. But travelers cannot decide on their tour as they wish. So there is no way for them to know the cost for their selected package because some people cheat the travelers. Then it brings ill-fame to the country. As a result of it, foreigners get a bad image of the country.

Most travelers would like to watch some places and get broad knowledge about them. They want to know about languages, communities, cultures, religions. But most guides would provide incorrect information of they do not know about the value and importance of these places.

And small scale business, local producers, religious places and functions have low concentration in the tourism sector. As a solution they can be advertised via this web site.

Before travelers come to Sri Lanka, they could get a wide knowledge about the country via the SrilankanVisit.lk website. As well, they can plan their destination as they wish. At the same time, through this website it is expected to increase the Grand National Product, attract a bigger number of tourists to Sri Lanka, and help small scale business and popularize Sri Lanka among other countries.
