## ABSTRACT

The purpose of this study was to assess the level of organizational support for intrapreneurship and assess the level of intrapreneurship by identifying the differences of the level of intrapreneurship in terms of organizational support in Software development sector in Sri Lanka. To carry out the study, 42 of Sri Lanka Association of Software Industry (SLASI) registered companies have selected and the results implies that both of organizational support and intrapreneurship are at the moderate levels in the industry. The findings also verify that there are differences on level of intrapreneurship in terms of all organizational supporting factors except level of organizational structure and boundaries dimension. In accordance to the findings of the study it stimulates some important suggestions to develop the intrapreneurship environment in software development industry with a high level of organizational support for intrapreneurship. The research also provides directions to future researches by giving guidelines to perform future researches in wider background.
